

ULTRA PURE WATER & DEMINERALIZER / WATER SOFTENER

Pure Water Treatment System

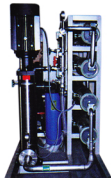

The Way to Success

The quality of purewater and ultrapure water become critical factors for the development of new generations of industrial, such as semiconductor / electronics, pharmaceutical, petrol-chemicals, power generation and high grade metal finishing processes.

Mixed Bed Polisher

Reverse Osmosis (R.O) Unit

Glory Water is capable of designing and supplies small to large scale systems to meet your requirements. Our process stages cover the pretreatment, demineralization, fine purification and final polishing. Besides, Glory Water offers modular service packages tailored to your needs to ensure a continuous compliance of the water quality.

Portable Deionised Water Unit
